Projects

Pet Adoption Management application   Live site | Client site | Server site
- This is a user and admin role based website. It's mainly built around two things. One is to create a post for your pet adoption so that the user can request his pet for adoption.
- The second thing is that a user can create a donation campaign for his pet so that a user can donate for his pet.

Technologies : React.Js , Node.js , Express.js , MongoDB, Firebase, Desi UI, Tailwind.Css. JWT.

Library Management application   Live site | Client site | Server site
- This website mainly created for Users can borrow the book and have to return the book within a specified time.
- If any book becomes quantity 0 then no one else can borrow that book.And users can not see this book on all books pages.only can see the available book in all books pages.

Technologies : React.Js , Node.js , Express.js , Jwt, Firebase for handling authentication, MongoDB, Desi UI (Tailwind Component) .
